

INFORMATION MANAGEMENT SERVICES

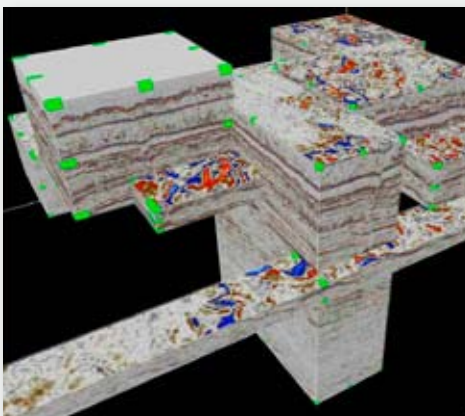

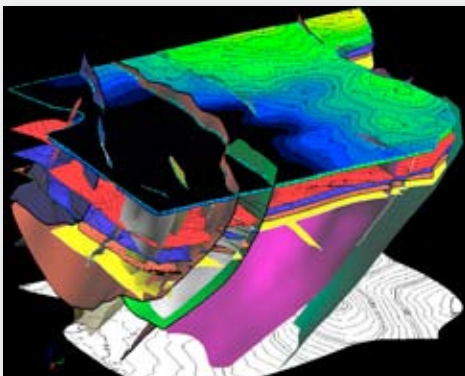

GWL's information management consultants have an excellent track record of delivering value through service and project work throughout the oil industry and beyond.

Our consultants have worked as management, technical professionals and support staff. We do not need to spend time learning the business, therefore our clients benefit from short start-up times and rapid delivery of appropriate solutions.

GWL's IM consultants work with clients to improve their information management processes. This directly impacts business performance in terms of:

- **More effective access to quality information**
- **Better utilisation of corporate knowledge**
- **Reduced confusion and information overload**
- **Operating and capital cost savings and, importantly...**
- **Greater confidence in business decisions**

GWL's IM consulting services range from pure technology / systems focused expertise, to detailed data management knowledge and data handling skills in the petroleum sector. Whatever your needs, we have consultants who can make a difference to your business.
